Chakrabarti, Arun K.

Subject:

10/000628

I have a related case 09/991681, drawn to a polypeptide of SEQ ID NO:27-31.I would like to check for any double patenting.

Can you check whether the elected claims of 10/000628 that you have done first Office action are drawn to any polypeptide?

I could not get a hold of your case because it is on image.

Thanks

MINH TAM DAVIS

Abstract: The present invention relates to the production and purification of human prostate specific antigen (hPSA) by recombinant-DNAtechnology. hPSA was produced in an active form by the baculovirus expression vector system. Recombinant protein was secreted into the culture medium at a high yield by infected cells and purified to homogeneity by three-step procedure containing cation-exchange chromatography and gel filtration. The active protein obtained differs from the native protein in that it is unglycosylated and that it does not

degrade the kallikreinspecific substrate H-D-Pro-Phe-Arg-pNA.HCl. The inactive form of hPSA obtained has two additional amino acid residues in its Nterminus, and it does not form complexes. Possible uses of the recombinant protein are also disclosed.

#### RECOMBINANT HUMAN PROSTATE SPECIFIC ANTIGEN; ...

...OBTAINED BY RECOMBINANT DNA TECHNOLOGY USING BACULOVIRUS EXPRESSION SYSTEM; HAS DEFINED N-TERMINAL AMINO ACID SEQUENCE; DOES NOT COMPLEX WITH ALPHA-1-ANTICHYMOTRYPSIN OR ALPHA-2-MACROGLOBULIN; DOES NOT DEGRADE SPECIFIC

Abstract: The present
